<b>Cisco® Deploying Cisco® ASA VPN Solutions (VPN)</b>				<b>Cisco® Implementing Cisco® Switched Networks (SWITCH) / \$2,995</b>				<b>Cisco® Interconnecting Cisco® Networking Devices Part 1 (ICND1)</b>			
This course supports network security engineers goals in choosing, configuring, and troubleshooting the majority of Cisco ASA adaptive security appliance remote access and site-to-site VPN features to reduce risk to IT infrastructure and its applications.				This course is designed to help students prepare to plan, configure, and verify the implementation of complex enterprise switching solutions for campus environments using the Cisco Enterprise Campus Architecture.				This course focuses on providing the skills and knowledge necessary to install, operate, and troubleshoot a small branch office Enterprise network, including configuring a switch, a router, and connecting to a WAN and implementing network security.

This course combines five days worth of training content from the Network Infrastructure Technology Specialist, Active Directory Technology Specialist, and IT Professional Server Administrator courses of Windows Server 2008.				This course provides students with the knowledge and skills to configure and troubleshoot a Windows Server 2008 network infrastructure. Students will learn to implement and configure secure network access and implement fault tolerant storage technologies.				In this course, students will learn how to configure Active Directory Domain Services in a distributed environment, implement Group Policies, perform backup and restore, and monitor and troubleshoot Active Directory related issues.
