Fast Facts About Your Plan

There are many great benefits to being part of the GoTechNow 401(k) Plan. Among those benefits is exceptional customer service—online, by phone, or by wireless. In fact, you can count on your company and Fidelity to help support you every step of the way.

Best practices to consider:

- **The impact of an early start.** Your decision to start today could give you quite a bit more at retirement than starting five years from now.
- **Contribute as much as you can.** Fidelity considers 10% per paycheck to be a very good start. That amount can take you a long way toward reaching your financial goals.
- **Do what you can afford.** Start at a number that feels comfortable to you. You can always change it later. The important thing is to invest what you can afford and start right away.
- **Invest more in your plan, pay less in taxes.** Your pretax contributions come out of your pay before income taxes are taken out. You can actually lower your current taxes by investing in the plan today.¹

Find out how simple it can be to enroll, manage your account, and take advantage of what your company and Fidelity have to offer.

- Look inside for:
 - **Frequently Asked Questions** - the basic details of your plan including when you can enroll to availability of your money.
 - **Investment Options** - pick at least one investment option to get started, then consider the whole spectrum as you get more comfortable with planning.
 - **Resources for Staying on Track** - to help you meet your retirement goals, the plan offers a comprehensive communications program and planning tools to help you stay on track.

This spectrum, with the exception of the Domestic Equity category, is based on Fidelity's analysis of the characteristics of the general investment categories and not on the actual investment options and their holdings, which may change frequently. Investment options in the Domestic Equity Category are based on the options' Morningstar categories as of the most recent calendar quarter. Morningstar categories are based on a fund's style as measured by its underlying portfolio holdings over the past three years and may change at any time. These style calculations do not represent the investment options' objectives and do not predict the investment options future styles. Investment options are listed in alphabetical order within each investment category. Risk associated with the investment options may vary significantly within each particular investment category, and the relative risk of categories may change under certain economic conditions. For a more complete discussion of risk associated with the mutual fund options, please read the prospectuses before making your investment decision. The spectrum does not represent actual or implied performance.

An investment in a money market fund is not insured or guaranteed by the FDIC or any other government agency. Although money market funds seek to preserve the value of your investment at \$1 per share, it is possible to lose money by investing in these funds.

Additional Investment Options

Fidelity Freedom Funds® offer a blend of stocks, bonds, and short-term investments within a single fund. They are designed for investors who don't want to go through the process of picking several funds from the three asset classes but who still want to diversify among stocks, bonds, and short-term investments.

These funds are subject to the volatility of the financial markets in the U.S. and abroad and may be subject to the additional risks associated with investing in high yield, small cap and foreign securities.

Categories to the left have potentially more inflation risk and less investment risk

Categories to the right have potentially less inflation risk and more investment risk

Fidelity Freedom Income Fund®	Fidelity Freedom 2005 Fund®	Fidelity Freedom 2015 Fund®	Fidelity Freedom 2025 Fund®	Fidelity Freedom 2035 Fund®	Fidelity Freedom 2045 Fund SM
Fidelity Freedom 2000 Fund®	Fidelity Freedom 2010 Fund®	Fidelity Freedom 2020 Fund®	Fidelity Freedom 2030 Fund®	Fidelity Freedom 2040 Fund®	Fidelity Freedom 2050 Fund SM

The Fidelity Freedom Funds® are represented on a separate investment spectrum because each fund (except Fidelity Freedom Income Fund®) will gradually adjust its asset allocation to be more conservative as the fund approaches its target retirement date and beyond. Approximately ten to fifteen years after the fund's target retirement date, the asset allocation of each Freedom fund will match the allocation of the Freedom Income Fund. The spectrum illustrates the relative risk and return of each fund as compared with the other funds in the Freedom family. For more completed discussion of risks associated with the mutual fund options, please read the prospectus before making your investment decision. This spectrum does not represent actual or implied performance.

Unless otherwise noted, transaction requests confirmed after the close of the market, normally 4 p.m. Eastern time, or on weekends or holidays, will receive the next available closing prices.

This plan is intended to be a participant-directed plan as described in Section 404(c) of ERISA, which means that fiduciaries of the Plan are ordinarily relieved of liability for any losses under ERISA that are the direct and necessary result of investment instructions given by a participant or beneficiary.

Keep in mind, investing involves risk. The value of your investment will fluctuate over time and you may gain or lose money.

This document provides only a summary of the main features of the GoTechNow 401(k) Plan, and the Plan document will govern in the event of any discrepancy.

Pretax contributions are subject to the annual IRS dollar limit.

In general, bond prices rise when interest rates fall, and vice versa. This effect is usually more pronounced for longer-term securities.

The investment options available through the plan reserve the right to modify or withdraw the exchange privilege.

Investments in mid-sized companies may involve greater risks than those of larger, more well known companies, but may be less volatile than investments in smaller companies.

Investments in smaller companies may involve greater risks than those in larger, more well known companies.

Foreign investments, especially those in emerging markets, involve greater risk and may offer greater potential returns than U.S. investments. This risk includes political and economic uncertainties of foreign countries, as well as the risk of currency fluctuation.

Because of their narrow focus, sector funds may be more volatile than funds that diversify across many sectors.

Hardship distributions are not considered eligible rollover distributions and are not subject to 20% federal withholding. They are taxed as ordinary income and may be subject to a penalty when you file your income taxes. Please consult your tax adviser regarding your own tax situation.
